how a blast furnace works - foundrygate - how a blast furnace works introduction the purpose of a blast furnace is to chemically reduce and physically convert iron oxides into liquid iron called "hot metal". the blast furnace is a huge, steel stack lined with refractory brick, where iron ore, coke and limestone are dumped into the top, and preheated air is blown into the bottom. the raw materials require 6 to 8 hours to descend to the ...

teaching notes - teachit science - the blast furnace © teachitscience 2013 20942 page 3 of 3 molten slag drained off molten iron out hot air blown in hot air blown in **iron smelting in argyll, and the chemistry of the process** - with the slag when the furnace was tapped. this iron was suitable for making castings, but needed to have some carbon removed in order to make wrought iron and steel. this removal may have been carried out in argyll at furnace (lewis 1984). 23. $2c + o_2 \rightarrow 2co$ 1 charcoal oxygen carbon monoxide $2(FeO \cdot nH_2O) \rightarrow Fe_2O_3 + (2n+1)H_2O$ 2 limonite hematite $Fe_2O_3 + CO \rightarrow 2FeO$... **castleshaw iron smelting archaeology survey report** - drying out the iron ore prior to smelting and a cache of the raw material, iron stone. the the latter had probably been extracted from thin bands within the lower coal measure on this **wealden iron, second series volum 19, 1999** - a bloomery furnace produces iron by the direct process, the product is a solid piece of wrought iron or steel extracted straight from the furnace; this is an ancient process which produced iron suited to the blacksmith but is now only used by primitive people. this ancient furnace should be contrasted with the indirect process which produces a liquid cast iron that runs molten direct from the ... **the making of iron & steel - seaisi** - the metallic iron produced by such a furnace contains a relatively high proportion of carbon (4%) and is passed to the steelmaking process as a liquid at approximately 1450c, called "hot metal". **a smelter on a stick - earthlearningidea** - the furnace before the molten iron is poured out. thinking skill development: linking the small scale activity to the real world of the blast furnace is a bridging activity. resource list: • gas burner, or bunsen burner and gas supply • heat proof mat • pestle and mortar or heavy weight • powdered iron (iii) oxide • small wooden sticks, e.g. wooden splints or large coffee stirrers ... **iron slags on archaeological sites: an introduction lynne keys** - iron slags on archaeological sites: an introduction lynne keys historical metallurgy society what is iron slag? there are many different types of iron slag. **published in 2012 by - t4** - when pig iron comes out of the blast furnace, it is very brittle and has no use in industry. the pig iron must be refined in another furnace to turn it into steel. above is the map of the steps needed to turn iron ore into steel. refined- to make something pure brittle-shatters easily iron ore blast furnace pig iron basic oxygen furnace electric arc furnace steel iron to steel. chapter 3 iron ... **crucibles and their furnaces - wordpress** - crucibles and their furnaces • a crucible is a container that can ... oil drip furnace built by colin peck out of a beer keg. this particular furnace runs on both waste engine oil as well as the more environmentally friendly, kitchen fryer oil. the furnace will hold around a #9 crucible and will get hot enough to melt iron - as you can see he has cast his own crucibles out of iron from ... **steel / iron - hotwork international ag** - contact@hotwork hotwork steel / iron dry out and pre-heating - portable high velocity burners - adaptable to clients requirements - experienced manpower **iron furnace problem what is the porosity distribution in ...** - the iron-making process the iron ore pellets are in the size range 6-50 mm and are processed through a tube-like furnace called a "shaft furnace", which is depicted in a simplified manner in figure 1. **the history of moira furnace - north west leicestershire** - was blown out. despite plans to restart operations later in 1811, and even to build a second furnace to operate alongside the first, it appears that no further iron smelting took place. when restoration took place on the furnace in 1981 it still contained a working charge (the last lot of rocks ever poured in to the top). something went wrong during smelting that damaged the furnace beyond repair ... **iron here and there - winston churchill memorial trust** - furnace, operating the furnace, the tapping out of the iron into ladles, 'botting' the furnace to refill it, to pouring the iron into the moulds - and so it goes on. not many people know about this process, and to explain and successfully communicate it to people is not easy. in many ways it seems fitting that this process is used to make art, which is a non-verbal expression of something ... **mf 182-6 properties and uses of iron and steel slag** - iron blast-furnace slag blast-furnace slag is defined by the american society for testing and materials as "the non-metallic product consisting essentially of silicates and alumino-silicates of calcium
